Mission

“The HLSP is committed to facilitating and promoting hospital environments where knowledge based information results from the combination of health information, technology, human collaboration and access to information resources.”

About

The HLSP fulfills the information needs of hospital administrative, allied health, medical, nursing, and support staff and promotes inter-disciplinary library environments. The HLSP was formed in 1982 by the New York State Legislature and is a critical connection to current healthcare information access. This program is designed to provide medical information services to acute care hospitals throughout the six counties within the WNYLRC service region. The HLSP helps hospitals to meet and comply with knowledge-based health information JCAHO standards and other state and specialty-specific organizational standards. Each year, circuit librarians travel over 25,000 miles to provide library services to rural community hospitals and urban medical centers.

Administration

WNYLRC administers the HLSP which is funded in part by a grant from New York State Department of Education, Division of Library Development, and by hospital participation fees. Fees are determined by levels of participation.
and hospital bed size.

HLSP Regulations 90.17
HLSP Law 273

HLSP offers two primary program options:

Grant Hospitals: For the larger teaching hospitals, HLSP provides grant funds to supplement the hospital’s budget for library materials and equipment which results in enhanced access to health care information in the WNY community. Eligible hospitals must be under the direction of a .5 minimum FTE M.L.S. librarian in order to receive a grant.

Circuit Hospitals: For hospitals without a librarian on staff, circuit librarians regularly schedule on-site visits and provide off-site services when requested. They conduct reference and database searches, facilitate interlibrary loan requests, provide database and search training, visit hospital departments and develop and manage on-site library collections.

HUBNET

HUBNET (Hospitals and University at Buffalo Library Resource Network) is maintained by and provided through the Library Consortium of Health Institutions in Buffalo (LCHIB). HUBNET enables member institutions to access full text books, journals, and medical databases including Ovid MEDLINE, CINAHL, Cochrane Databases and many others.

Benefits

Value added benefits to participating hospitals include HLSP subsidized access to HUBNET resources, cooperative purchasing programs that provide preferred discounts on books, databases and serial service charges, and free or low cost continuing education and training classes at the WNYLRC Training Center. The HLSP annually offers several classes with Medical Library Association continuing education credits. It has also secured grants from outside organizations such as the National Library of Medicine to benefit participants.

MISP

WNYLRC administers the New York State Medical Information Subsidy Program or “MISP” in its service region. MISP funds are allocated to regional acute care hospitals libraries, and other institutions. Individual MISP subsidy quotas are primarily designated for acute care hospitals and are based on several factors including previous usage and availability of funds.

Upon request, WNYLRC deposits funds into hospital EFTS (Electronic Funds Transfer System) accounts to pay for medically-related interlibrary loan invoices. WNYLRC will also pay invoices on behalf of participants for medically-related interlibrary loans, mediated database searches on health-related topics, and access to electronic medical information databases. These funds benefit the health information needs of approximately 89 multi-type institutions including hospital, school, public, academic, etc. in the region.

HLSP Member Hospitals

Buffalo General Medical Center/Kaleida Health
Buffalo, NY 14203
